

Test Frontend

Part 1 (SPA React.js / Vue.js or Other Languages)

1. Slicing Login page, create a post to login and get the token
POST : URL -> <https://api.kontenbase.com/query/api/v1/e97cd589-1ccb-4cf3-86f9-27a8dd71861f/auth/login>
2. Slicing Register page, create a post to register and
POST : URL -> <https://api.kontenbase.com/query/api/v1/e97cd589-1ccb-4cf3-86f9-27a8dd71861f/auth/register>

Body :

- firstName
- lastName
- email
- password
- phoneNumber
- userType

Response

```
{
  "expiresOn": "2023-01-20T08:18:32.582451412Z",
  "token": "901079d43b80dad62e730a8490a94db0",
  "user": {
    "_id": "63c8fcd813b699b7d17db3b7",
    "email": "user1@gmail.com",
    "firstName": "Yosua",
    "lastName": "Sitire",
    "phoneNumber": "0987890233",
    "role": [
      "authenticated"
    ],
    "userType": {
      "color": "blue",
      "id": "63c8e0e9e08509ef459574c0",
      "value": "Student"
    }
  },
  "userId": "63c8fcd813b699b7d17db3b7"
}
```

3. Slicing Profile Page that has been created in figma
URL : <https://www.figma.com/file/9iM0ANdDnouZ1ZENJqxMwA/Soal-Frontend?node-id=0%3A1&t=luGzuKtJycTmWa58-1>

4. Slicing Add Experience and make a post to enter the list

Field :

- companyName
- country
- createdBy (ID token),
- start,
- end (null),
- currentJob (true/false),
- description

Response

```
{
  "_id": "63c9029713b699b7d17db3bd",
  "companyName": "Talent Insider",
  "country": "Jakarta",
  "createdBy": {
    "_id": "63c8fcd813b699b7d17db3b7",
    "email": "user1@gmail.com",
    "firstName": "Yosua",
    "lastName": "Siture",
    "phoneNumber": "0987890233",
    "role": [
      "authenticated"
    ],
    "userType": "63c8e0e9e08509ef459574c0"
  },
  "currentJob": true,
  "description": "Full stack",
  "end": null,
  "jobTitle": "Full Stack Developer",
  "start": "0001-01-01"
}
```

5. Get All List Experience in Slicing Profile

URL : <https://api.kontenbase.com/query/api/v1/e97cd589-1ccb-4cf3-86f9-27a8dd71861f/experiences>

6. Integration with backend using Redux Thunk

Notes about SPA:

- Integration with backend using Redux Thunk
- Use the basic style of your choice (Template/design yourself)
- Use the React router library to navigate from/to different pages

A decorative graphic in the top-left corner consisting of several overlapping, curved, diagonal stripes in black, red, and white.

Good to Have

- Unit test
- CI action to run the best. You can use GitHub action

Notes:

Here is a preliminary test for the recruitment process at Talent Insider

The following are the Pre-Test and Practical Test, the collection schedule is Tuesday at 15.00, please send it with

Notes:

1. All answers pushed to private Github repository
2. Show results in README.md on Github and explain how to set it up
3. Invite a member from Talent Insider to review (bagus.windhu@talentinsider.com)
